

Maksymilian Chojniak

Warsaw, Poland | +48 536-597-300 | maks.chojniak@gmail.com | linkedin.com/maks-chojniak

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building real-time systems, web applications, networked applications, and performance-critical software in Python, C# and C++ . Experienced in distributed systems, testing, deploying, and scalable architecture.

EDUCATION

Sapienza University of Rome

Rome, Italy

Erasmus+ Student Exchange Program (6 Months).

Sept 2026 - Present

- Relevant Coursework: Deep Learning, Computer Vision, Artificial intelligence, machine Learning, Foundations of Computer Science.

Czestochowa University of Technology

Czestochowa, Poland

Bachelor of Science (BSc) in Artificial Intelligence - Continuation of CS Coursework

Feb 2026 - Present

- **GPA: 4.8/5.00.**

- Relevant Coursework: Data Structures, Neural Networks, Machine Learning.

Czestochowa University of Technology

Czestochowa, Poland

Bachelor of Science (BSc) in Computer Science - Coursework switched to AI

Oct 2024 - Feb 2026

- **GPA: 4.98/5.00** - Rector's Scholarship for Outstanding Academic Achievement.

- Relevant Coursework: Object-oriented programming, Discrete math, Databases, Data Structures.

EXPERIENCE

TRUMPF Huettinger

Warsaw, Poland

Software Engineer - Intern

Jul 2026 – Sept 2026

- Developed and maintained a scalable internal analytical platform for processing large datasets, running complex calculations, and generating business-facing reports in a production environment.
- Created reusable, versioned analytical workflows that reduced manual effort by 30-50% and improved consistency across recurring analyses.
- Optimized the system for high-volume data workloads, handling 50k+ records per run while supporting CI/CD deployment and managed release processes
- Introduced background processing, reducing execution time for large analyses by 60-80% and eliminating blocking waits for end users.
- Implemented secure, ensuring controlled internal usage and protecting sensitive analytical data.

Tech Stack: Python, Javascript, Django, FastAPI, PostgreSQL, Vue.js, Celery, Redis, REST APIs, Azure AD, Git, Docker, Linux.

Travel Agency Management System

Czestochowa, Poland

Full-Stack Developer

Oct 2025 – Feb 2026

- Developed a full-stack .NET application using MVVM architecture and WPF UI, ensuring separation of concerns and maintainable code structure.
- Implemented modular service layers following SOLID and Clean Architecture principles to support scalable business logic.
- Wrote parameterized NUnit test suites covering 100+ reservation scenarios to validate correctness and edge cases.

Tech Stack: C# , .NET 9, WPF, Entity Framework, NUnit.

Blocky Patrol ([Link](#))

Warsaw, Poland

Lead Programmer (Mobile Development)

Dec 2022 – June 2025

- Designed and implemented a custom object pooling system in C# , reducing heap allocations and garbage collection overhead by 25%, enabling stable 60 FPS on low-end devices.
- Built real-time player state synchronization using Firebase Realtime Database and Cloud Functions, achieving 99.9% consistency across distributed sessions.
- Integrated Google Play services (OAuth 2.0 authentication, In-App Purchases, AdMob mediation), improving monetization and user retention.
- Developed unit and integration test suites with NUnit covering 80%+ of core gameplay logic, reducing production regressions during live updates.

Tech Stack: C# , C++ , Unity 2022.3.26f1, .NET 7, NUnit, Firebase, Google Play SDK.

Iso Racer ([Link](#))

Warsaw, Poland

Software Engineer

Sept 2021 – Jan 2024

- Implemented a custom binary encoder/decoder for network packets, reducing payload size by 15% and improving multiplayer latency and stability.
- Built a grid-based AI navigation system with runtime interpolation to compute optimal racing lines based on vehicle velocity and track geometry.
- Engineered a deterministic physics-based movement system (ray casting, tire friction modeling) for realistic vehicle dynamics in multiplayer.

- Integrated Steamworks APIs for P2P networking, cloud saves, and achievements, supporting cross-device progression.

Tech Stack: C# , C++ , Unity 2021.3.15f1, .NET 7, NUnit, Steamworks API, Mirror.

TECHNICAL SKILLS

Programming Languages: Python, C# , C++ , JavaScript, TypeScript, PostgreSQL, MySQL
Backend/Frameworks: Django, Django DRF, FastAPI, Vue.js, .NET, Celery, Redis, Unity, WPF, Entity Framework
Cloud/Infrastructure: Git, Docker, Red Hat, JFrog, Linux
Skills: REST APIs, SSO Auth, Azure AD, Firebase, Client-Server Networking

CERTIFICATES

• <u>(HackerRank) Problem Solving - Intermediate</u>	2025	• <u>(HackerRank) C# - Basic</u>	2023
• <u>(CppBuzz) C++ Certification</u>	2025	• <u>(Google) Generative AI</u>	2025
• <u>(Google) Develop AI-Powered Prototypes</u>	2026		

LEADERSHIP & ACTIVITIES

TwinTech Titans	Warsaw, Poland
<i>Active Contributor / Developer</i>	<i>Oct 2023 – Present</i>
• Collaborate on technical projects focused on game development and algorithmic challenges.	
Polonia Warszawa & National Team	Poland
<i>Professional Athlete (Basketball)</i>	<i>2016 – 2021</i>
• Competed at national level. Polish National Championship winner. multiple MVP awards.	

SKILLS & INTERESTS

Languages: Polish(Native), English(B2), French(Beginner)
Interests: Basketball, Competitive Programming, Cycling, Game Jam Participation, Traveling.
